

Most Popular Given Names

Listed here are the 10 most popular given names for males and females year-by-year from 1880 to 1997 according to Social Security Administration records. The source file is a one percent sample of Social Security Number card applications. The selection criteria are based on the last four digits of the Social Security Number, which are random and not correlated with a particular geographical region. In cases where multiple cards were issued to the same person, a reason for this might be a lost card or a name change, the name on the last application was used. This file is not limited to persons born in the United States but is representative of all Social Security Number card holders. For purposes of this document, names have not been edited or grouped together according to spelling variations of the same name. People quoting from this document are urged to explicitly acknowledge this qualification.
